

Enserva Responds to New Federal Cabinet

Calgary, AB – July 26, 2023 – Gurpreet Lail, President and CEO of Enserva issued the following statement regarding today’s comprehensive federal government cabinet shuffle:

“From coast-to-coast-to-coast, the hardworking men and women who work in Canada’s energy services, supply and manufacturing sector are going above and beyond to create jobs and support economic growth while contributing to the energy evolution that is leading us to a lower emissions future.

“On behalf of our members, Enserva will continue to constructively engage with the staff, non-partisan public servants and Ministers, who remain in place including Ministers Guilbeault, Freeland, O’Regan, Vandal and Wilkinson.

“We also look forward to discussing our shared priorities with Minister Rodriguez, (Transport), Minister Boissonnault (Employment, Workforce Development and Official Languages) and other Ministers, staff, and officials who are responsible for policies and regulations that impact our sector.

“As we have previously stated, Enserva members remain concerned by labour and skills shortages, regulatory confusion and duplication from federal and provincial governments and immigration backlogs that harm our ability to attract and retain the workers of tomorrow.

“We will continue to engage with the federal government to find practical solutions to these challenges so that together we create new opportunities for workers and families in every region of Canada.”

“Our members have been and will continue to do incredible work to increase productivity and reduce emissions in their processes. Enserva will continue to proudly stand up for the Energy services, supply and manufacturing sector and the men and women behind the energy to ensure prosperity in communities across Canada.”
